Making more of life

Smart, innovative, versatile, spacious... the Toyota Corolla Verso is all these things and a whole lot more.

With its athletic design, ingenious seating modularity and sophisticated driving experience, the Corolla Verso is the ideal companion for experiencing the rich diversity of our modern world. Genuine Toyota accessories take that concept one step further. Each item in the accessory range is designed to reflect the creativity and quality of the Corolla Verso itself. Every choice is an opportunity to pack even more into life and express your personal taste for comfort, practicality and style.

Your choice for style

The Corolla Verso's dynamic good looks catch the eye wherever you go. Add Toyota style accessories and you make even more of an impression.

In particular, alloy wheels give your Corolla Verso a special air of distinction. With two 16" and two 17" designs to choose from you can make a statement that reflects your own true individuality. Each wheel is purpose designed for Toyota and quality made to be lightweight, strong and durable.

Equally stylish are detail accessories such as the chrome exhaust pipe finisher and rear lower trunk garnish. Both blend harmoniously with your car's unique character and provide those subtle extra touches of pure quality.

What's important about genuine Toyota accessories is that every item is designed to co-ordinate and complement the Corolla Verso. This gives you freedom to be selective and create a look that's just right for the way you like things to be.

- 1. Alloy wheels Sequoia 16"
- 2. Alloy wheels Tupelo 16"
- 3. Alloy wheels Pekea 17"
- 4. Alloy wheels Hickory 17"
- 5. Rear lower trunk garnish
- 6. Exhaust pipe finisher

The look and feel of luxury

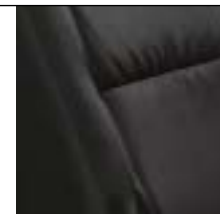

Leather or leather and Alcantara seats and door panels add a new dimension of luxury to the Corolla Verso's remarkably versatile interior.

There's a choice of pleated leather or a combination of smooth leather with suede-style Alcantara. Each design is especially tailored for the Corolla Verso and fully compatible with side air bag operation.

The high quality leather complies with Europe's toughest standards. And the Alcantara, though soft and comfortable to touch, is very hard wearing and has a practical wipe-clean surface.

Aluminium door sill scuff plates and a choice of aluminium or leather gear shift knobs add a personal touch.

Also available with pleated leather upholstery.

Putting the show on the road

Every journey becomes a showtime world of fun and adventure for rear seat passengers with the Toyota in-car entertainment system.

Passengers can play DVDs and CDs, connect to a games console and even review video camera recordings.

Wide-format LCD screens securely embedded in the front head-rests provide crystal clear viewing. A remote control puts all the features under fingertip command. And there's an infrared transmitter built into the central pillar to deliver exceptional sound quality through cordless stereo headphones. Importantly, each screen has independent controls so that passengers can play together or do their own thing.

The system's DVD player tucks neatly away under the front passenger seat. Special features include a DVD memory function that remembers where it was in a movie when the system was turned off so that it can resume again in exactly the same position.

For security, optional headrest covers are available to hide the screens from prying eyes when your Corolla Verso is parked.

1. In-car entertainment system
2. Home gaming system compatible
3. DVD quality
4. Remote control for maximum convenience
5. Security headrest cover

Your personal guide

Toyota's innovative TNS300 DVD satellite navigation system makes finding your way so much easier. It provides both audio and visual directions and, being based on advanced DVD technology, has an ultra-fast route and alternative route calculation. Conveniently, maps for the whole of Europe are contained on a single disc so there's no need to change when you cross a border.

As an option, you can also include a dynamic route guidance (DRG) function. This collects traffic data from radio stations and warns you of problems so that your system can recommend an alternative route.

4. Toyota navigation system (TNS300)

Technology to live with

Designed with a focus on ease of use and quality, Toyota high-tech accessories build extra levels of practicality and pleasure into the Corolla Verso experience.

With the Toyota hands-free mobile telephone kit, you simply clip your phone* into a special cradle mounted in the front central cup holder. Keeping in touch on the move becomes safe and easy. But, more than that, the cradle is interchangeable so you can transfer it and your phone to another car using the same system. Alternatively, other people with a different phone can have their own cradle and slot it into place whenever they drive your car. Taking flexibility to the extreme, the kit is available in a choice of occasional, business and executive versions.

Equally rewarding are the underseat six disc CD changer and active subwoofer. These complement your car's fitted audio system to offer hours of high quality listening.

* Contact your local Toyota retailer for details of mobile phone compatibility.

For that spirit of adventure

The Toyota accessory range offers masses of safe additional carrying capacity and flexibility for lovers of active living.

The aerodynamic roof rack and the cross bars for vehicles equipped with roof rails are perfect examples. Each system is tailor made to the Corolla Verso, easy to install, fully lockable and combines with a wide range of special attachments. Among the attachment options there is a central locking luggage box, a central locking ski box and two sizes of lockable ski holders, a lockable bicycle carrier and holders for surfboards and kayak boats.

For even more versatility you have a choice of detachable and fixed towing hitches that suit all sorts of trailers. And there's also a rear bicycle holder that fixes very securely to either type of towing hitch and can be extended to carry up to three bicycles.

1. Cross bars with luggage box
2. Cross bars with ski box
3. Cross bars with surfboard/mast holders
4. Roof rack with Barracuda bicycle holder
5. Roof rack with horizontal ski holders
6. Roof rack with universal boat holders
7. Detachable towing hitch
8. Fixed towing hitch
9. Rear bicycle holder

Designed for practicality

For day to day practicality, the Toyota range of storage accessories provides the ideal complement to the versatility of your Corolla Verso's seating modularity.

What could be simpler and yet more effective than horizontal or vertical cargo nets for maintaining a tidy trunk, or the easy to install coat hanger for wrinkle free jackets?

Also there are some great ideas for your younger rear seat passengers. The aviation table folds out to reveal a bottle holder, pocket and handy surface. Similarly, the seat back storage bag is ideal for keeping toys and things in order. Conveniently, the bag's lower section detaches to be worn as a rucksack when you reach your destination.

- 2. Vertical cargo net
- 3. Seat storage bag
- 4. Coat hanger
- 5. Aviation table

Protecting your younger passengers

As a parent, perhaps the most important of all Toyota accessories is the range of purpose designed, high comfort, high safety child restraint systems.

The Babysafe is for babies up to about 15 months (13 kg) and offers increased side impact protection. It is secured by the vehicle seat belt and has a folding canopy to shelter against sun and wind.

Duo Plus accommodates children of between eight months and four years (approximately nine to 18 kg). It locks into the Corolla Verso's ISO fix bars and so anchors directly to the car body for maximum stability and safety.

For children between three and 12 years (15 to 36 kg) there's the Kid restraint system. The design ensures correct seat belt positioning over the pelvis and shoulder, while deep side wings and a curved head support optimise side impact protection. A height adjustable headrest makes it ideal for the growing family.

Parking sensors are colour matched to your car.

On guard against knocks and scrapes

The modern world can be tough on a car no matter how carefully you drive. Reassuringly, Toyota accessories add an extra layer of protection.

The parking aid system with its four colour co-ordinated sensors is a great help when space is tight. It automatically switches on when you engage reverse gear and watches over the whole of the rear of your car. To warn you of obstacles, its three stage alarm becomes progressively more urgent the closer the obstacle gets.

If you opt for stylish alloy wheels, it's a good idea to also fit Toyota wheel locks. The locks are made of hardened steel and have a special coded key for maximum anti-theft protection. Similarly, fog lamps not only add to front end styling but also provide real benefits when driving in bad weather or poor light conditions.

For general protection, mud flaps are an easy way to minimise stone-chip damage. Equally, bumper corner protectors and side mouldings, both of which can be painted to your car's body colour, provide excellent guards against minor scrapes.

3

Maintaining a pristine appearance

You can live life to the full with your Corolla Verso and be sure of Toyota accessories to help keep the interior in top condition.

To protect your carpets there's a choice of velour, needle felt or rubber floor mats for all three rows of seating. For your trunk, there's a tailored fit rubber trunk liner with special anti-slip pattern. And for the paintwork, you can apply a rear bumper protection film to guard against those unsightly scratches that can happen when loading or unloading the trunk.

4

Care for you and your car

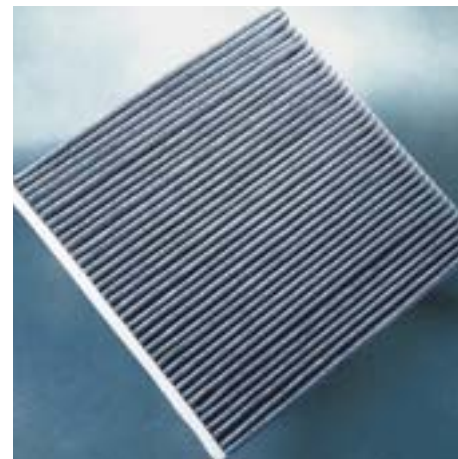

Whatever's happening in the world outside, no matter how extreme the conditions, Toyota accessories will take extra care of you and your car.

External temperatures may soar or plummet, but Toyota's ever-reliable manual air conditioning will keep the environment inside your Corolla Verso just how you like it. Add a clean air filter into the system and you make things even better by eliminating dust, pollen and fumes. In congested city streets, all you have to do is activate the air recirculation function to enjoy the luxury of temperature controlled clean fresh air.

If you live in a cold weather area, the engine pre-heater is as equally important for your car and the world at large. It not only makes ignition easier, but also saves engine wear, lowers fuel consumption and helps reduce exhaust emissions.
